Evens Science Prize 2009: Research Report

In 2009, the Evens Foundation asked the Youth Mental Health department of the Collaborative Antwerp Psychiatric Research Institute, Antwerp University (CAPRI) to draw up European policy recommendations for implementing effective care in Europe for young persons who present serious violent behaviour, based on an inventory of existing evidence-based care programmes and on the UN Convention on the Rights of the Child.

The research report, "**Prevention and Intervention programmes for violent youth in Europe**", can be downloaded [here](#). The report is aimed at policymakers at the local, national and European level and at professionals engaged in youth care on a day-to-day basis.

The results of the report were presented on 9 September 2010 at the **EFCAP-EU congress** (European Association for Forensic Child and Adolescent Psychiatry, Psychology and other involved Professions) in Basel. EFCAP-EU is a federation of national associations for forensic youth mental health professionals.

Evens Prize for Visual Arts 2011

The Evens Foundation has launched the new edition of its **Prize for Visual Arts**. The objective is to prospect on current contents and forms of artistic practice that re actualize and put in perspective the question of how art relates to the contemporary world, reflecting on singularity, the real, social involvement, the possibilities and limits of artistic agency, and, more intimately, on how we, through art, create a relation to ourselves, to others, and to the world.

A selection committee composed of the leaders of 10 European art Institutions have proposed a list of 20 artists, and an independent jury will select the winner in December 2010. A publication/critical reader will gather artist's reflections on the current models and possibilities of artistic agency. For more details, click [here](#).
